

ANOMALY

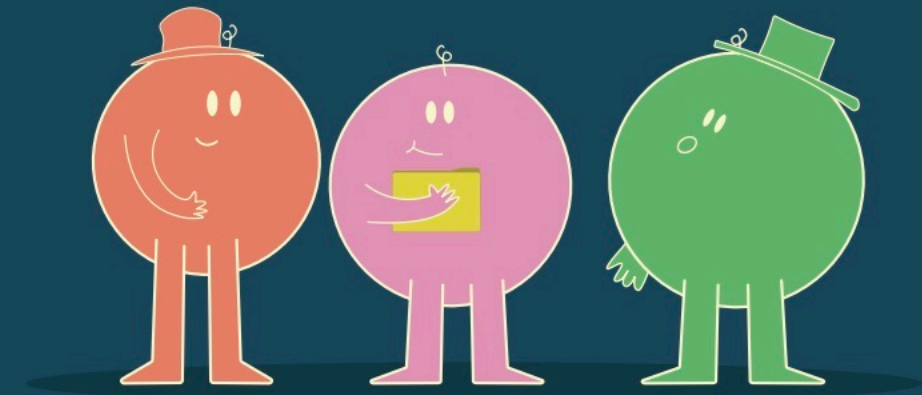

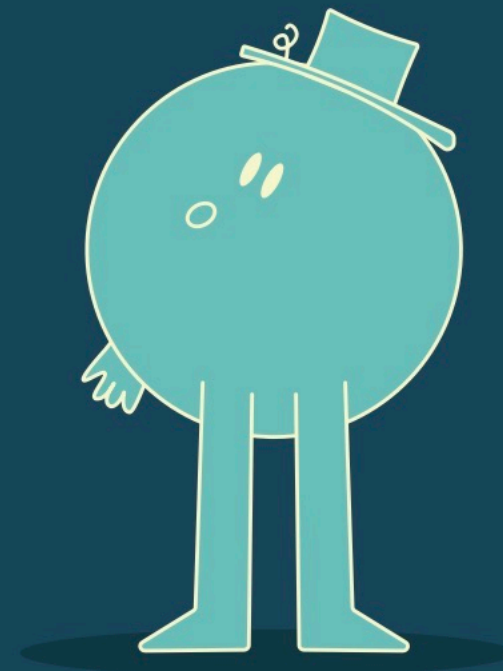

Think fast, spot lies and win !

GAME RULES

Concept :

In **Anomaly**, dive into the dynamics of workplace soft skills while detecting deception and outsmarting your friends.

Use wit, observation, and strategy to uncover impostors-or fool everyone if you're the **Anomaly**.

Objective :

Employers : Collaborate to expose the Anomaly and the Glitch(es) while protecting the secret word.

Glitch : Blend in by defending your similar but different word. Your goal is to confuse and mislead the Employers.

Anomaly : Without knowing the secret word, decipher the Employers' clues while staying undetected. Guess the secret word if eliminated for an instant win.

Setup :

4-6 players : 1 Anomaly, 1 Glitch, and rest are Employers.

7-10 players : 1 Anomaly, 2 Glitches, and rest are Employers.

Distribute cards face-down. Roles and words remain secret. Word Selection : The Employers and Glitches are given a **single word** (the Glitches receive a slightly altered version). The Anomaly receives **no word**.

How to play:

1. Starting the Game

The player with the "Beginner" card starts the first round.

2. Gameplay: Word Contribution

Players take turns (clockwise) contributing a word:

- **Employers** : Say a word related to their secret word.
- **Glitches** : Defend their alternate word like employers'.
- **Anomaly** : Create plausible responses in line with the theme.

3. Word Rules

No Repetitions : Each word must be unique.

No Synonyms : Avoid overly obvious connections to your word.

Anomaly's Role : Use creativity and deduction to blend in while collecting clues.

4. Discussions & Voting

After each round, players discuss their suspicions and vote :

Step 1 : Vote to identify the Anomaly.

Step 2 : If the Anomaly is eliminated, vote to identify Glitches.

5. Role Reveal

The player with the most votes reveals their card :

If an Employer : The team loses a valuable ally.

If a Glitch : The team moves closer to victory.

If the Anomaly : He gets one chance to guess the secret word.

Winning Conditions :

Employers : Successfully eliminate the Anomaly and all Glitches.

Glitch : Survive undetected or cause enough confusion to disrupt the Employers' strategy.

Anomaly : Stay undetected until the end of the game.
OR, if eliminated, correctly guess the secret word for win.

Strategic Tips :

Employers : Balance clarity and subtlety when giving clues.
Avoid being too obvious or too vague. Observe others closely and listen for inconsistencies.

Glitches : Defend your alternate word convincingly.
Use plausible associations without overreaching.

Anomaly : Pay attention to patterns in players' words.
Avoid hesitation or overconfidence—blend in naturally

Exemple :

Employers' word : Imagination

Glitch' word : Innovation

Anomaly : No word
